Primary Examiner

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 11:

At line 2, delete the hyphen "-" preceding the word "the" (second appearance).

Claim 12:

At line 2, delete the hyphen "-" preceding the word "the" (second appearance).

Claim 14:

At line 4, delete the hyphen "-" preceding the word "said" (second appearance).

At lines 15-16, delete "ByteErrorRate =
$$(K + 2T) * n_error_$$

(K + 2T) * n_total

At lines 15-16, insert "ByteErrorRate = [(T + 1)*n_error] / [(k + 2T) * n_total] ".

At line 21, replace "(k+2t)" to "(k+2T)".

At line 24, replace "thresholdsand" with "thresholds; and".

Claim 16:

At line 15, replace "BER = $0.5*(T + 1)*n_error/(k + 2T) * n_total$ " with "BER = $[0.5*(T + 1)*n_error] / [(k + 2T) * n_total]$ ".

Claim 27:

At line 1, replace "4comprising" with "4 comprising".

2. The following is an examiner's statement of reasons for allowance:

The present invention pertains a process for automatically altering the data rate on a logical channel with changing noise conditions. The prior arts, however, do not teach the process comprising a combination of features of resetting a total uncorrectable codeword count for a logic channel for an interval, resetting a total codewords received count for the logical channel for the interval, receiving a burst on the logical channel, and adding the total codewords received in the burst to the running total of codewords received for the interval, receiving information regarding the number of uncorrectable codewords in the received burst and adding the number of uncrorrectable codewords to a running total of uncorrectable codewords for the logical channel over the interval, determining in any way whether the interval has been completed, if the interval has not been completed, returning to the feature of receiving a burst on the logical channel, if the interval has been completed, calculating a byte error rate of the logical channel and comparing the byte error rate to one or more byte error rate thresholds, the byte error rate (ByteErrorRate) = [(T + 1) * n_error] / [(k + 2T) * n total] where T is the number of the maximum correctable bytes in the R-S codeword, n error is the total number of uncorrectable R-S codewords for the interval from predetermined interval usage code (IUC) burst types, n total is the total number of received R-S codewords from predetermined IUC burst types received within the time

interval, K is the number of information bytes in an R-S codeword of a specific IUC; and (k+2T) stands for the R-S code word length in bytes; determining if a change in data rate throughout is required based upon the comparison of the byte error rate to the one or more byte error rate threshold, and if a change in data rate throughput is required, generating a signal indicating a need for a change in the data rate of the logical channel. Hence, the prior arts of record do not anticipate nor render obvious the claimed inventions. Thus, claims 1-6, 8-9, 11-14, 16-19, 26-31 and 35- 37 are allowable over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christine Tu whose telephone number is (571) 272-3831. The examiner can normally be reached on Monday-Thursday 8:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jacques Louis-Jacques can be reached on (571) 272-6962. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
